## DETAILED ACTION

*Claims 1-11 are pending.*

### ***Restriction Requirement***

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:
  - I. Claims 1 and 4-7, drawn to a method of inhibiting tumor cell growth comprising administering an effective amount of regulatory T cells, classified in Class 424, subclass 93.1.
  - II. Claims 1 - 2 and 7 drawn to a method of inhibiting tumor cell growth comprising administering an effective amount of cytokines, classified in Class 424, subclasses 278.1
  - III. Claims 1-2 and 7 drawn to a method of inhibiting tumor cell growth comprising administering an effective amount of antigen, classified in Class 424, subclasses 184.1.
  - IV. Claims 1-3 and 7 drawn to a method of inhibiting tumor cell growth comprising administering an effective amount of antibody, classified in Class 424, subclasses 130.1.
  - V. Claims 8 and 9, drawn to a method of inhibiting tumor cell growth, comprising administering effective amount of Ly6A protein, classified in Class 424, subclass 184.1
  - VI. Claims 8, 10 drawn to a method of inhibiting tumor cell growth, comprising administering effective amount of a nucleic acid sequence encoding Ly6A protein, classified in Class 514, subclass 44.
  - VII. Claims 10 and 11, drawn to a method of inhibiting tumor cell growth, comprising administering effective amount of an osteopontin protein, classified in Class 424, subclass 184.1
2. Groups I- VII are different methods. These inventions are different with respect to ingredients, method steps, and endpoints; therefore, each method is patentably distinct.

Art Unit: 1644

3. These inventions are distinct for the reasons given above. In addition, they have acquired a separate status in the art as shown by different classification and/or recognized divergent subject matter. Further, even though in some cases the classification is shared, a different field of search would be required based upon the structurally distinct products recited and the various methods of use comprising distinct method steps. Moreover, a prior art search also requires a literature search. It is an undue burden for the examiner to search more than one invention. Therefore restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
